Wetlands International

Council for Scientific and Industrial Research, South Africa

Thursday, October 9, 2008

2:30 – 4:00

Alliance Workshop
Room 130, CCIB

Building a bridge between conservation and local and regional development priorities

Lessons from the Andes, Southern Africa, Madagascar and Indonesia will highlight the challenges and opportunities of integrating biodiversity and human well being priorities into sustainable landscape design. Key principles for implementing alternative models of development within landscape conservation will be identified. Topics discussed will include: Payment for Ecosystem Service programs; conservation set-asides on private lands; green agricultural incentives; regional landuse planning, and climate change mitigation and adaptation measures.
