1.1 Introduction

CI, the Contracting Entity, is soliciting offers from Offerors (firms or consultants) to submit proposals to carry out Preparation of Project Document/CEO Endorsement Package for a Medium-sized Project (MSP).

**Project Title:** Strengthening capacity of institutions in The Gambia to meet transparency requirements of the Paris Agreement.

**Project Location:** Gambia

**Location of Consultancy:** Home based with travel to the country if COVID 19 situation changes.

**Languages Required:** English

**Duration:** 10 months

**Indicative consultancy start and end dates:** 10 Months (Heavy lift between 1st September 2020 – 28th February 2021. The CEO Endorsement Package will be submitted to the GEF week of 26th April 2021. The remaining months will be used to address any comments from STAP and the GEFSec).

The Capacity Building Initiative for Transparency (CBIT) was established at COP 21 to support developing countries to enhance transparency requirements as defined in Article 13 of the Paris
Agreement. The overall goal of CBIT is to:

a) Strengthen national institutions for transparency-related activities in line with national priorities;
b) Provide relevant tools, training and assistance for meeting the provisions stipulated in Article 13 of the Agreement; and
c) Assist in the improvement of transparency over time

The transparency provisions of the Paris Agreement require developing countries to (a) regularly monitor, analyze, and report their national GHG emissions (by sources) and removals (sinks); (b) Provide information necessary to track progress towards achieving their Nationally Determined Contributions (NDCs); (c) Provide information related to climate change adaptation and mitigation; and (d) Provide information on financial, technology transfer and capacity building support needed and received.

The project titled, “Strengthening capacity of institutions in The Gambia to meet transparency requirements of the Paris Agreement” was approved by the GEF Secretariat in July 2020. The Implementing Agency (IA) is Conservation International and the Executing Agencies (EAs) are Ministry of Environment, Climate Change & Natural Resources (MECCNAR) and Vital Signs Programme. Notably, this GEF funded project seeks to support The Gambia to meet the enhanced transparency requirements defined in Article 13 of the Paris Agreement.

The approved PIF includes the project components provided below.

Component 1: Strengthen capacity of national institutions to manage the National Green House Gas Inventory (GHGI) and Measuring, Reporting and Verification (MRV) system to improve transparency over time.

This component will strengthen national institutions for transparency-related activities through: supporting the Gambia to establish a national Green House Gas Inventory (GHGI) and MRV System; and strengthening structures for GHG data sharing amongst GHG emitting sectors through improving inter and intra-agency coordination

Component 2: Strengthen capacity of key stakeholders in The Gambia on data management for the GHG emissions inventory and MRV system.

This component will provide relevant tools, training and assistance for meeting the provisions stipulated in Article 13 of the Agreement. This will be achieved through training key personnel from GHG emission sectors to develop the GHGI and utilise the GHGI to prepare their BURs and National Communications (NCs) hence ensure consistent reporting to the UNFCCC.

Component 3: Development of an integrated knowledge management platform for sharing transparency activities

This component will result to an integrated knowledge management platform for sharing transparency related information. This information will improve understanding of progress made by the Gambia towards achieving the NDC and; outline support needed and received that will enable the Gambia realise the commitments provided in the NDC. Since this is a platform for sharing transparency information, results of outcome 1 and 2 will also be posted here.
**OBJECTIVES:** The purpose of the PPG is to fully design activities, outputs, and outcomes of the “Strengthening capacity of institutions in The Gambia to meet transparency requirements of the Paris Agreement” Medium Size Project (MSP) and to fully develop a set of project documentation for submission to the GEF Secretariat and approval. Standard rules for development of a GEF MSP apply. Copies of the GEF templates and guidelines can be accessed at: http://www.thegef.org/documents/templates
