Terms of Reference - NATIONAL CONSULTANCY SERVICES ANNOUNCEMENT:
CONSULTANCY FOR THE PROVISION OF ECONOMIC ADVISOR SUPPORT TO LIBERIA

Building upon a strong foundation of science, partnership, and field demonstration, Conservation International (CI) empowers societies to care for nature responsibly and sustainably, our global biodiversity, for the well-being of humanity. CI’s strategy is to serve as a trusted advisor to decision makers at all levels to help societies establish healthy, sustainable economies that secure nature’s ability to provide enduring human well-being.

We accomplish this through the four pillars of our work:
1. We innovate to identify and implement practical and effective solutions to problems. This innovation takes place throughout the organization and relates to all aspects of CI’s work including science, field implementation, policy, markets, partnerships, etc.
2. We promote healthy, sustainable economies to achieve those impacts
3. We demonstrate these impacts throughout CI geographies (including Liberia)

CI works through global agents of change, the major partners that help us amplify and achieve global impact

General Background
As part of the NDC Partnership Climate Action Enhancement Package for Liberia, Conservation International and Ministry of Finance and Development Planning (MFDP) seeks a consultant to provide an Economic Advisory support to the Government of Liberia. The NDC Partnership has initiated this support to integrate climate actions in recovery planning in response to the COVID-19 global pandemic. This support comes at a critical time when many countries are revising their commitments to the Paris Agreement in 2020, through the enhancement of their Nationally Determined Contributions (NDCs). While countries design stimulus packages and recovery plans in response to COVID-19, there is opportunity to ensure that national climate ambition is an integral component of short- and long-term recovery and economic growth strategies.

The main objective of this consultancy is to analyze opportunities in the economic recovery plans of Liberia that align with national climate agenda, the planned and ongoing NDC-related investments and projects, to conduct costed measures of low carbon and climate-resilient investments with recommendations on how to integrate climate considerations into Government’s short-, mid- and long-term responses in the COVID-19 recovery state; and develop a contextualize recommendations on feasible fiscal instruments to stimulate green growth as part of COVID19 economic recovery.
